Chapter 1. Start iVMS-4200

1.1 Install the Software

**Step1:** Double click the program file to enter the following InstallShield Wizard as shown below:

![Figure 1.1 Welcome to InstallShield Wizard](image)

**Step2:** Click “Next” to start the InstallShield Wizard. Select the language (English) for installation, and then click “Next” to continue.
Step3: Install vcredist_x86 patch/WinpCap

Select the driver you want to install.

vcredist_x86 patch: for X86 operating system
WinpCap: for open source software, SADP driver

Install vcredist_x86 patch
Start to install the vcredist_x86 patch and then click “Next” to continue.
In the License Terms dialog box, click “I have read and accept the license terms”, and then click “Install” to install the vcredist_x86 patch.

After the Setup Complete interface appears, click **Finish** to complete the installation of vcredist_x86 patch.
Install vcredist_x86 patch

Follow the installation prompt to complete the installation of WinPcap. If it has been installed on your computer, you can cancel this step.

**Figure 1.6 Install vcredist_x86 patch-Complete Installation**

Install WinPcap

Follow the installation prompt to complete the installation of WinPcap. If it has been installed on your computer, you can cancel this step.

![Install WinPcap](image2)

**Figure 1.7 Install WinPcap**

**Note:** The SADP is used for automatically searching the online device in the local...
After the driver has been installed, continue the following steps.

**Step5:** Select Client and PC NVR Server to install on your computer. User can also click **Browse** to change the directory to save the program files. Click “Next” to continue.

![Select Installation Programs](image)

**Figure 1.8 Select Installation Programs**

**Step6:** In the License Terms interface, click “I accept the terms of the license agreement”, and then click “Next” to continue the installation.

![License Agreement](image)

**Figure 1.9 Select Installation Programs**

**Step7:** Click “Install” to start installation of the selected programs.
Figure 1.10 Install the Selected Programs

**Step 8:** After the installing progress is completed, enter the Setup Type interface to select the desktop shortcut icons for the installed programs. Click “Next” to continue the installation.

Figure 1.11 Create Desktop Shortcut Icons

**Step 9:** Click “Finish” to complete the installation.
1.2 User Registration

For the first time to use the iVMS-4200 software, you need to register a super user for login.

Input the super user name, password and confirm the password in the dialog box and click **Register**. Then, you can log in as the super user.

**Note:** Enter, Space, and TAB buttons are invalid for the user name and password. The password cannot be empty, and it should not be less than six characters and can’t be copied and pasted.

1.3 Import Camera Wizard

After registration and login, the following message box will pop up:
Click **OK** to start the wizard and add the device, or click **Cancel** to exit the wizard.

**Step 1:** According to the hint, click **Import Camera** icon to enter the Camera Import control interface.

![Figure 1.15 Enter Camera Import Interface](image)

**Step 2:** Add IPC

Click **Add Device** and then input the device information. Select Export to Group box.
and then click Add in the Add Device dialog box.

![Connection Settings](image)

**Figure 1.17 Add DVR**

**Step 3:** After adding the device according to the above steps, you will see the toolbar after the device name.

Click to enter the Device Parameters configuration interface (Figure 3.19).

Click to edit the connected device settings.

Click to delete the added group.

Click to refresh the page.

Click to import all the monitoring point to the group named by the name of the device.

**Step 5: Import Channel to Group**

In the left area on the Camera Import interface, click to select the channels and then click Import button to import the selected channels to the Group on the right. Refer to figure below.
Note:
1. You can hold the Ctrl key on PC to select multiple channels or click **Import All** button to select all channels for import.
2. The devices to be added must be online currently.
3. Each channel can be added to one group only once, while the same channel can be added to different groups.
4. Up to 50 channels can be added to each group, with a maximum of 256 channels for all the groups totally.

**Step 6:** After importing the selected channels to the group, you can return to the control panel and then enter the main preview interface to get a live view of the added channels.

**Chapter 2. Live View & Control**

**Note:**
A camera group is required to be defined before live view. For the grouping operation, please kindly refer to chapter 4.3 Add a Group.
2.1 Main Preview Components

Please click the icon “Main Preview” of the control panel, or click View -> Main Preview on the toolbar to start live view.

Chapter 3. Recording

iVMS-4200 software provides local and remote recording modes. Here we will demonstrate the typical remote scheduling recording. For other recording methods, please refer to the manual.

3.1 Remote Recording

When the video storage devices are HDDs, NetHDDs or SD/SDHC cards installed in the DVR or IP cameras, you may adopt remote recording mode as well.

1. Format the HDD or SD/SDHC card: After adding the devices into iVMS-4200, enter the Device Management interface and then HDD sub-menu to format the storage devices first, shown in the figure below.

![Figure 3.1 Format the HDD](image)

2. Enable Local Recording: Go to **Camera Configuration** Panel and tick Local Recording of the Schedule tab.

Note: Here the Local Recording refers to the recording on the DVR or IP Camera.
1. Recording Schedule Setup: After enabling the Use DVR option, please click Edit Schedule Template and select a recording schedule from the templates shown as below, please refer to previous chapter for schedule setting procedure.

![Figure 3.3 Recording Templates](image-url)
Chapter 7. Playback

Based on the different recording modes, the playback function consists of three playback modes: Local playback and Event Playback. For demonstration purpose, we will demonstrate the most typical playback based on the remote scheduled recording.

7.1 Instant Playback

1. Go to Main Preview panel, double-click a channel to enable the tool bar shown as below, and click button to start instant playback.

![Figure 7.1 Switch Live Preview/Playback Mode](image)

2. In instant playback interface, please click button to start playback the first video files of current day; click and buttons to fast or slow play the video. Click to pause.

3. The table below is a list of other buttons in this interface for video management.

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Picture capture" /></td>
<td>Picture capture</td>
</tr>
<tr>
<td><img src="image" alt="Start/Stop video cutting" /></td>
<td>Start/Stop video cutting</td>
</tr>
<tr>
<td><img src="image" alt="Download the video file with flow control" /></td>
<td>Download the video file with flow control</td>
</tr>
</tbody>
</table>
4. You may also use the time bar at the bottom of the Main View panel to adjust the playback progress. Also and buttons are used to expand and narrow down the time bar so user can choose a more accurate playback time.

1. Make sure to import all the channels that you wish to play back in Import Camera panel.
2. It is also required to enable continuous recording on all the alarm/motion-triggered channels before event playback.
